

Moodle Direct v2 – Release Notes

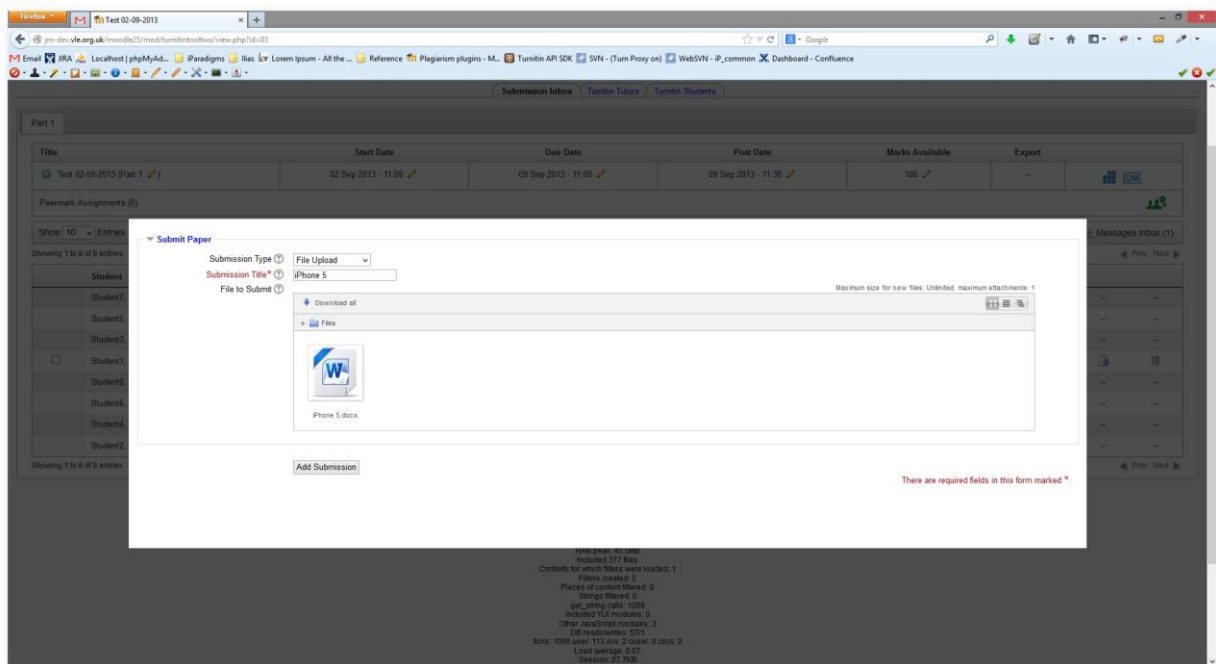

What is Moodle Direct v2?

Moodle Direct V2 is the latest version of the Moodle Direct integration for Turnitin. Moodle Direct V2 installs separately within Moodle so that it can be used in parallel with the current plug-in.

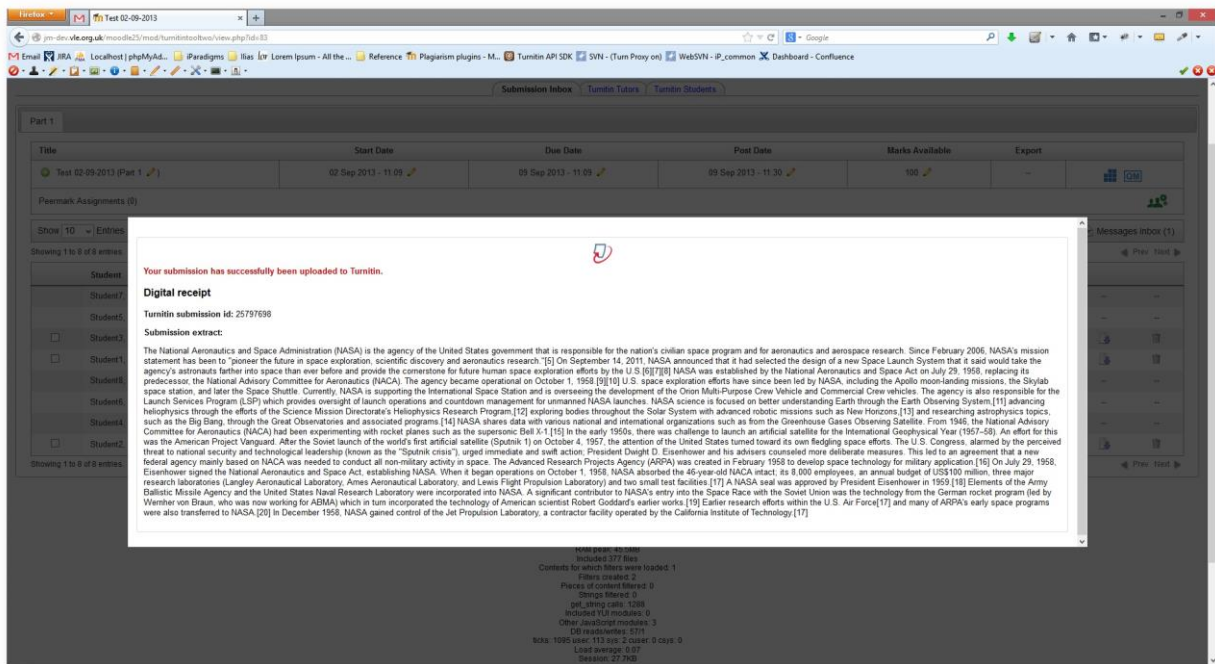

As a result existing assignments will not transfer to Moodle Direct V2 automatically, however should you want to transfer them you can make use of the migration tools (explained further on).

Submission Process

Submission is now via a lightbox where files can be dragged and dropped into the file manager area.

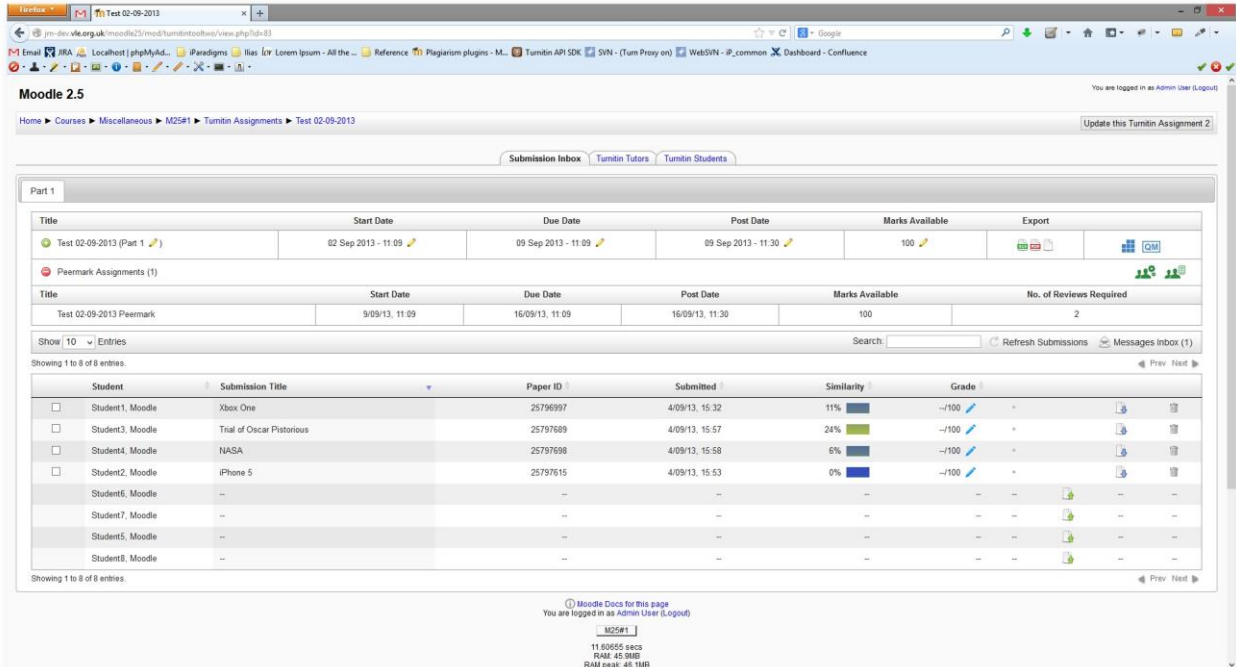

Users are provided with an extract of their submission as proof that we have received their submission.

Summary and submission via Inbox

The summary and submission screens have been removed and everything combined into one inbox screen.

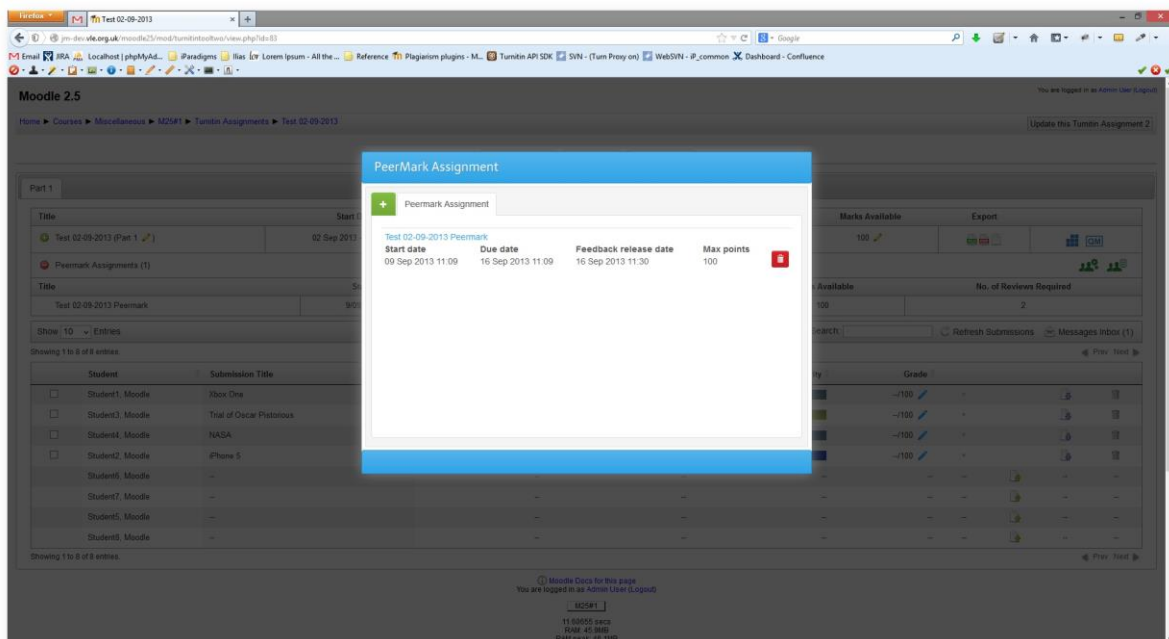

The inbox has been separated by part with each part navigable by tab. The part title, dates and marks available can be edited on screen without having to go to a specific edit page.

All the previous bulk download options can be requested from here and can then be accessed from the Messages inbox.

PeerMark

PeerMark manager, PeerMark reviews, Rubric Manager and QuickMark manager are all accessible from this screen. If a student is logged in and a rubric is attached to the assignment they will be able to view the rubric from this inbox screen as well.

If there are any PeerMark assignments based on this Turnitin assignment then the main details are also shown for these on the inbox screen.

PeerMark manager, Rubric Manager and QuickMark Manager are also accessible from the assignment edit screen.

Class Migration

A major new feature of version 2 is Class Migration. This feature allows you to query the assignments stored on Turnitin and link them to Moodle. This approach facilitates the migration between web use of Turnitin and Moodle. The solution provides two modes of use; bulk and individual. By default users will be shown all classes on which they are enrolled as instructors unless they are an administrator, in which case they will see all classes on this Turnitin account. They can search and filter the classes by title, end date and the platform/integration from where they were created. This is accessible via the site administration area and a block which is included in the version 2 package that can be installed on a user's home and/or course page.

Note: This feature is not intended to be used to migrate from V1 Moodle to V2 Moodle. The recommend way of implementing V2 is to run V2 in parallel with V1 continuing to access assignments created in V1 until they are complete. Although it

is possible to use the migration tools to move small volumes of assignments between V1 and V2, by deleting the assignments in V1 and then using the migration tool to relink the assignments in Turnitin it is complicated.

From the class migration screen, users can also edit the end date of a class.

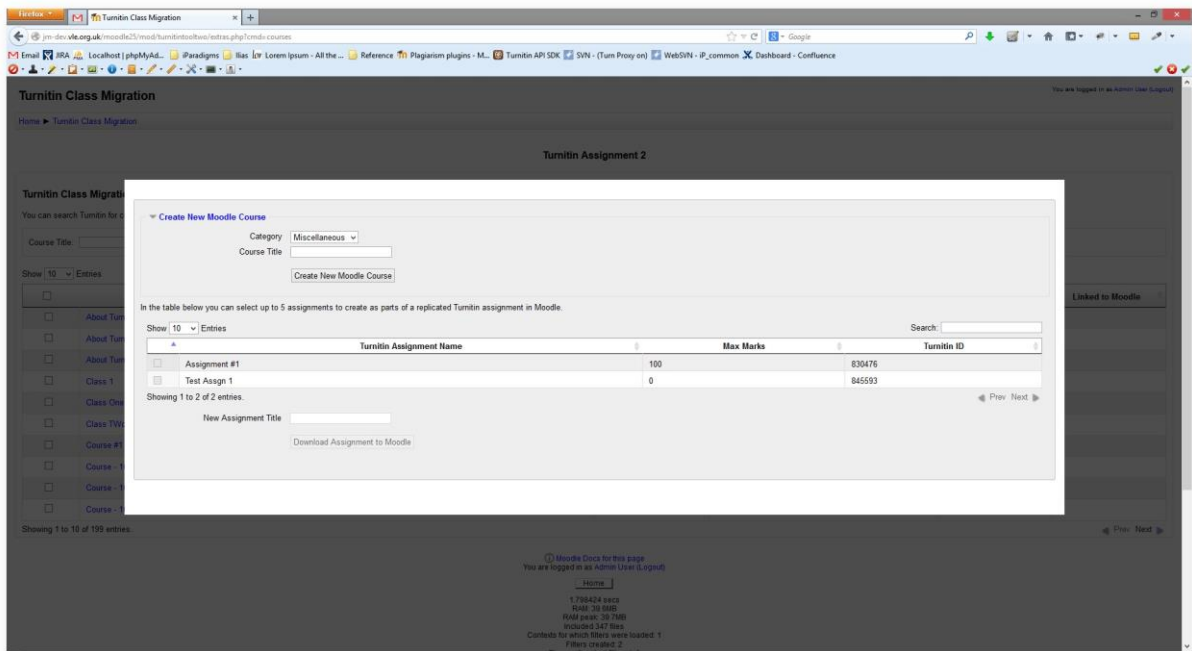

Bulk class migration allows a user to select a number of classes to recreate in their moodle environment. They can specify whether this will recreate all the assignments contained in the class as well.

Note: if contemplating the use of the migration tool help transfer from Blackboard or a previous version of Moodle you must test the process on a staging server first.

The screenshot shows the 'Turnitin Class Migration' web interface. At the top, there's a navigation bar with 'Home' and 'Turnitin Class Migration'. Below this, a section titled 'Turnitin Assignment 2' contains a search form with fields for 'Course Title', 'Integration' (a dropdown), and 'Class End Date', along with a 'Search Courses' button. Below the search form, there's a section for 'Select Course Category' (currently set to 'Miscellaneous') and a checkbox for 'Recreate all Assignments of selected classes in Moodle?'. A 'Recreate Courses' button is also present. The main part of the interface is a table listing courses. The table has columns for 'Course Title', 'Integration', 'Class End Date', 'Turnitin ID', and 'Linked to Moodle'. The first three rows are checked, indicating they are selected for migration. The table lists various courses like 'About Turnitin 101', 'About Turnitin 102', 'About Turnitin 103', 'Class 1', 'Class One', 'Class Two', 'Course #1', and several 'Course - 10th April 2012' entries. At the bottom, there's a status bar showing 'Showing 1 to 10 of 199 entries' and a 'Home' button. A small footer note mentions 'Moodle Docs for this page' and 'You are logged in as Admin User (Logout)'.

Course Title	Integration	Class End Date	Turnitin ID	Linked to Moodle
<input checked="" type="checkbox"/> About Turnitin 101	No Integration	14 July 2012	357094	
<input checked="" type="checkbox"/> About Turnitin 102	No Integration	14 July 2012	357135	
<input checked="" type="checkbox"/> About Turnitin 103	No Integration	14 July 2012	357159	
<input type="checkbox"/> Class 1	No Integration	10 August 2013	510661	
<input type="checkbox"/> Class One	Moodle Direct	1 January 2013	359368	
<input type="checkbox"/> Class Two	Moodle Direct	1 January 2013	359401	
<input type="checkbox"/> Course #1	Moodle Direct	3 August 2012	364927	
<input type="checkbox"/> Course - 10th April 2012	Moodle Direct	10 October 2012	391511	
<input type="checkbox"/> Course - 10th April 2012	Moodle Direct	10 October 2012	391954	
<input type="checkbox"/> Course - 10th April 2012	Moodle Direct	10 October 2012	391975	

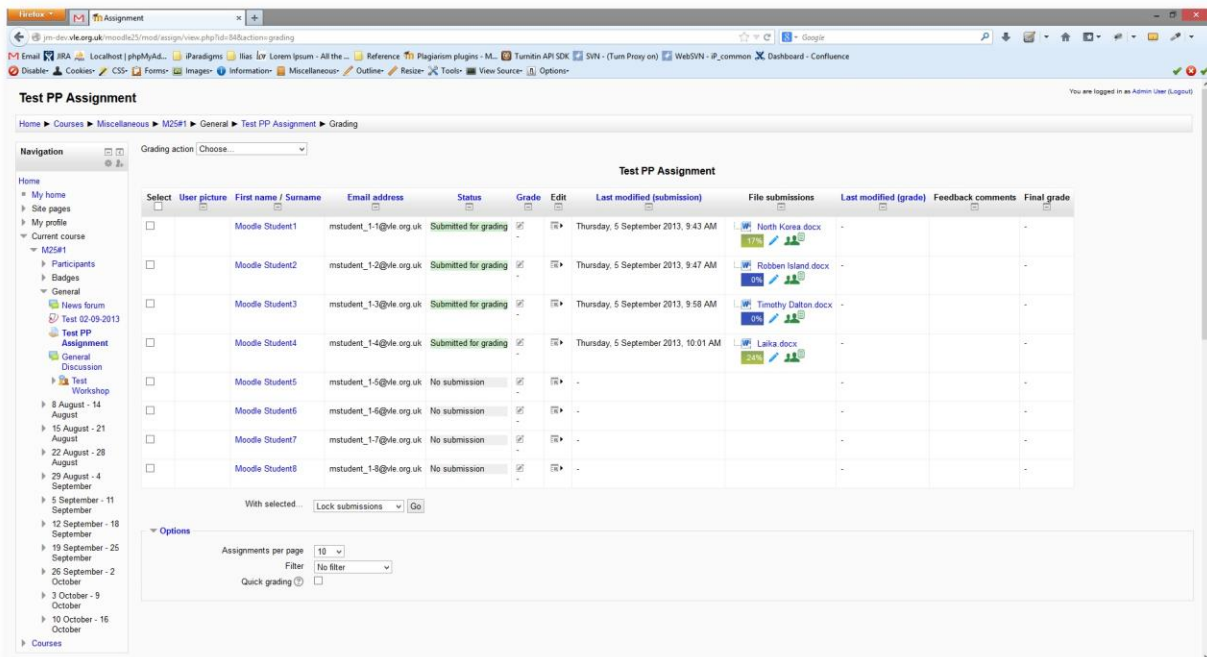

Individual Class Migration - this allows a user to recreate individual classes or link a Turnitin class to an existing unlinked moodle course in their moodle environment. They can select any number of assignments from within that class to recreate in their moodle environment as well.

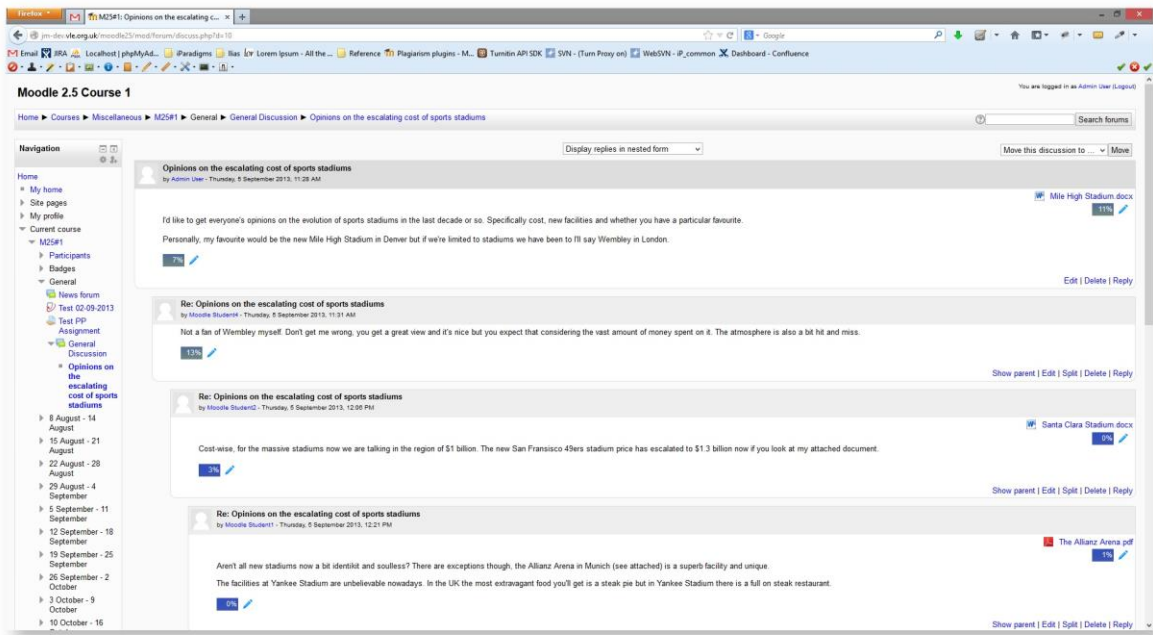

Moodle V2 Plagiarism Plugin (support for Dan Marsden's Moodle Integration)

The version 2 package includes a Plagiarism plugin to replace the plugin previously built by Dan Marsden at Catalist.

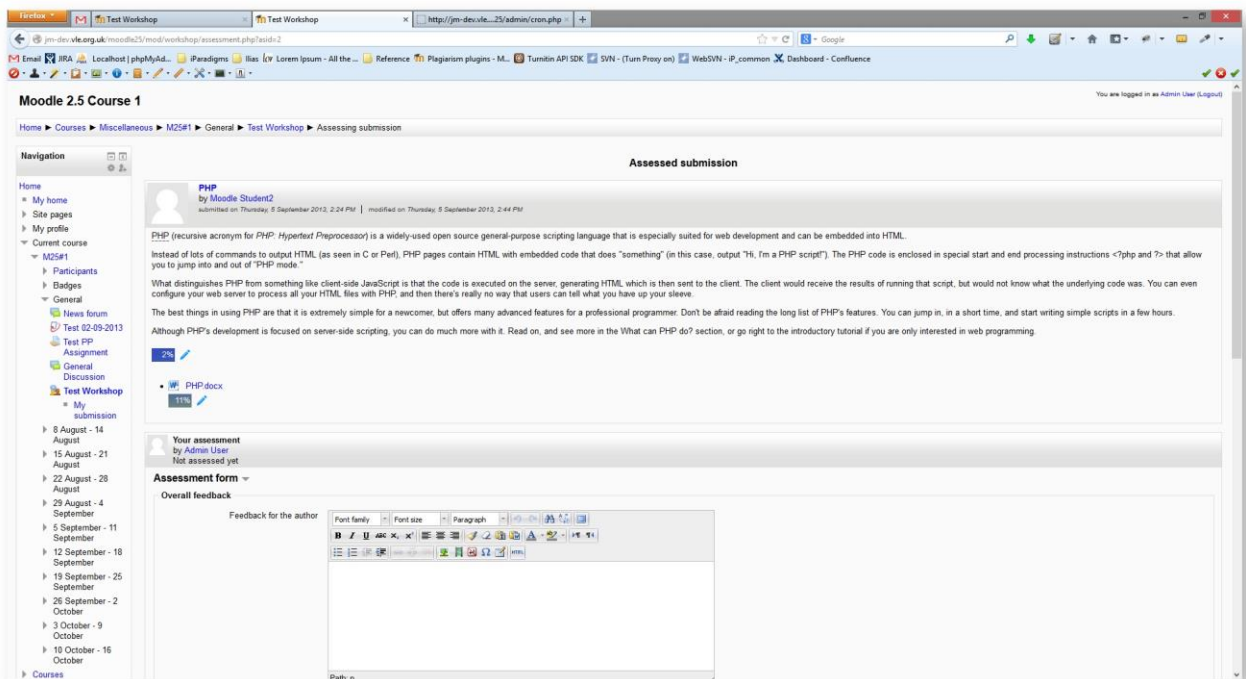

The plagiarism plugin works on moodle assignments,

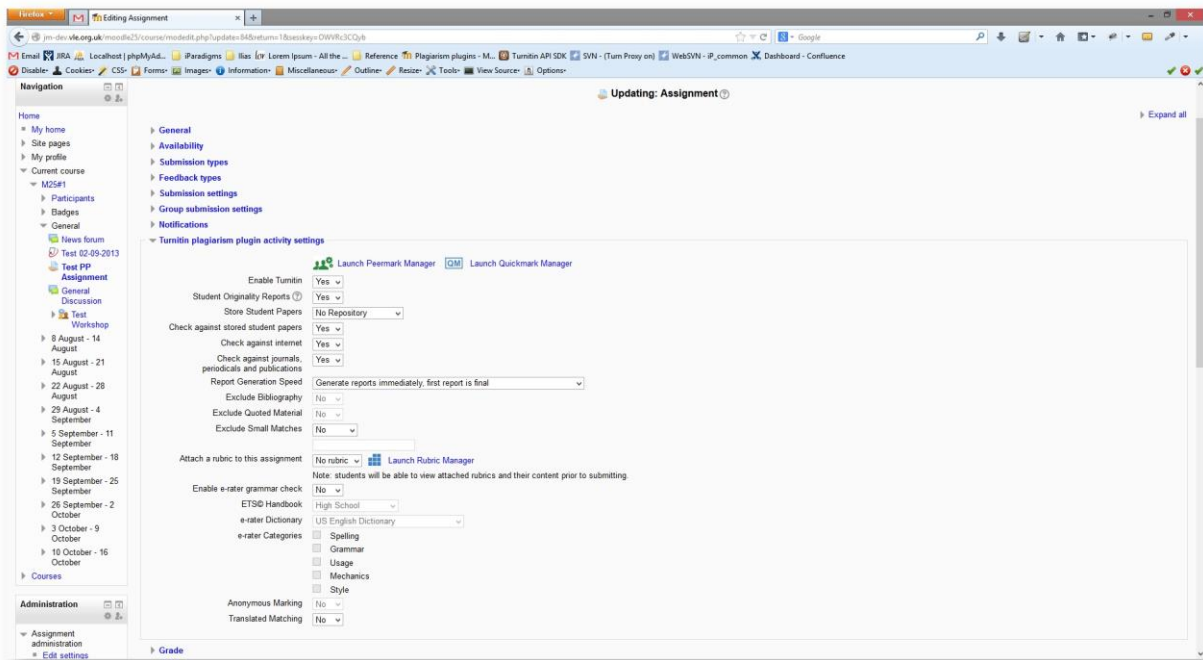

forums

and workshops.

As with Moodle direct; the PeerMark manager, Rubric Manager and QuickMark Manager are accessible from the module edit screen.

If a PeerMark assignment exists then it can be accessed from the link next to the links for GradeMark and Originality Report, as seen on the assignment inbox in screenshot.
